

Press Release from Bailey County Attorney Jackie Claborn:

Beginning today, June 11, 2020, we will begin releasing daily Covid-19 information to the public regarding the number of tests administered to date, the number of recovered cases, the number of active cases, and the number of positive tests to date. This information will be available every evening at approximately 5pm on the Muleshoe/Bailey County Emergency Mgmt Facebook Page at <https://www.facebook.com/Muleshoe-Bailey-County-Emergency-Mgmt-104145881333313/> All Covid-19 information and updates will come from this page in the future. Updates will no longer be available on County and City pages.

With the increasing number of cases in our area, we want to do everything we can to keep the public informed. We will not be releasing any information on exposure sites unless we determine through the investigation that there was a substantial risk of exposure to the public.

Again, we want to thank Bailey County and Muleshoe citizens for following state and local guidelines to help prevent the spread of Covid-19. With the increasing cases in our area, it is more important than ever to keep following these guidelines.
